## **DETAILED ACTION**

### ***Response to Amendment***

1. In view of applicant's amendment filed 30 December 2004, acknowledgement is made of the cancellation of previously rejected claims 8 and 9.

### ***Allowable Subject Matter***

2. Claims 1-7, 10 and 11 are allowed over the Prior Art of record.
3. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the independent claims 1, 3, 10 and 11 is the inclusion of the limitations of a process and/or apparatus of introducing/accommodating a filling level measurement device in a tank opening including a "dog" element fashioned at least in part on the perimeter of the filling measurement device wherein the a "clearance" area is created (as in claim 10) and wherein the "dog" presses and deforms (i.e. creates a bulge, or induces bulging of the seal) in a direction inside of the tank in the "clearance" area (as in claims 1, 3 and 11). The closest reasonable Prior Art reference is US 6,118,282 to Grieger, which discloses a process/apparatus for introducing a filling level measurement device in a tank opening (see Figure below) having seals and tapered portions, however, does not show a seal pressed into a "clearance" area which deforms/bulges towards the interior of the tank.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
